

EPM Experience Supporting Nuclear Cyber Security Programs

EPM has a highly experienced team supporting all phases of Nuclear Cyber Security Project Implementation.

EPM is equipped to support with Cyber Security Consultants experienced in all aspects of Nuclear Cyber Security program development and implementation, including Cyber Security Risk Assessments, Design Document Review, Security Control Analysis and Policy & Procedure Development. Specific areas of expertise include information security and risk management, business continuity and disaster recovery planning, oversight of multi-disciplined teams, client interface, and project coordination to support NRC, and NERC/CIP compliance.

The EPM team has extensive fleet level knowledge in cyber security training and program development, defense in depth protective strategy development, and other requirements consistent with NRC Regulation 10 CFR 73.54. Team members have working knowledge of NEI 13-10, NEI 08-09 Rev.6, NEI 10-04 and NEI 10-08, NEI 10-09, NEI 04-04, Reg Guide 5.71 and NIST SP 800-53.

The EPM team is comprised of degreed professionals with skills in nuclear engineering, computer science, combined with six years of nuclear cyber security experience along with more than thirty years of digital instrumentation and control system maintenance and engineering experience. Our Cyber Security Assessment Group has Electrical and I&C Systems Engineering, Operations and Cyber Security Consulting experience at several nuclear power plants. Certifications currently held by our Consulting Staff includes Information Systems Security Professional-Information Systems Security Management Professional (CISSP-ISSMP), Security+ and several SANS security engineer courses. Team members hold or have held several CSAT and CSIRT qualifications such as Cyber Security Specialist, IT Subject Matter Expert (SME), Engineering SME, SRO and STA certifications. All Cyber Security consultants and specialists currently hold nuclear power plant access clearance at several nuclear sites and are in the critical group.
